

PRESSE RELEASE

FAI`s Jet-Fleet expanded to 20 Aircraft!

German Operator FAI rent-a-jet AG has added a Learjet 40XR to its fleet of Business Jets, boosting the Learjet-Fleet to now 14 Aircraft reflecting one of the largest in Europe. The LJ 40XR, D-CLUZ is operated by FAI on behalf of a Corporate Client. Beside the 14 Learjets FAI operates CL 604`s, Global Express, CRJ 200LR and Falcon 900 DX EASy, now a fleet of 20 Business-Jets in total.

FAI closed the books of the first semester 2011 with revenues of €25 m (USD 37 m) and is expecting annual revenues for 2011 of more than €50 m (USD 74), what reflects a growth of around 20 % vs. 2010.

“With our brand new, company owned Hangar- and FBO- Facilities at Nuremberg Intl. Airport in Germany, FAI now is more attractive for aircraft owners, looking for a professional Turnkey-Management incl. Maintenance, and there are some owners around not quite happy with their existing Management-Company.” (*Siegfried Axtmann, Chairman and Founder in a Statement*)

FAI will be present for the first time at Jet Expo in September in Moscow with a Booth and a Falcon 900 on Static Display.

Nuremberg, August 2011
